

1. CUSTOMER (CUSTOMER_ID, FULL_NAME, ADDRESS, PHONE, DOB, TOTAL_SALES, REG_DATE)

- **Description:** The Customer table stores information about member customers. It includes the following attributes: customer ID, full name, address, phone number, date of birth, registration date, and total sales (the total value of all invoices for this member customer).
- **Columns:**
 - CUSTOMER_ID (Primary Key): Unique identifier for each customer.
 - FULL_NAME: Customer's full name.
 - ADDRESS: Customer's address.
 - PHONE: Customer's phone number.
 - DOB: Customer's date of birth.
 - TOTAL_SALES: Total value of all invoices for the customer.
 - REG_DATE: Date the customer registered as a member.

2. EMPLOYEE (EMPLOYEE_ID, FULL_NAME, HIRE_DATE, PHONE)

- **Description:** The Employee table records details of sales employees, including their full name, hire date, contact phone number, and a unique employee ID to distinguish each employee.
- **Columns:**
 - EMPLOYEE_ID (Primary Key): Unique identifier for each employee.
 - FULL_NAME: Employee's full name.
 - HIRE_DATE: Date the employee started working.
 - PHONE: Employee's contact phone number.

3. PRODUCT (PRODUCT_ID, PRODUCT_NAME, UNIT, COUNTRY_OF_ORIGIN, PRICE)

- **Description:** The Product table stores information about products, including a unique product ID, product name, unit of measure, country of origin, and selling price.
- **Columns:**
 - PRODUCT_ID (Primary Key): Unique identifier for each product.
 - PRODUCT_NAME: Name of the product.

- UNIT: Unit of measure for the product (e.g., piece, kg).
- COUNTRY_OF_ORIGIN: Country where the product was manufactured.
- PRICE: Selling price of the product.

4. INVOICE (INVOICE_NO, INVOICE_DATE, CUSTOMER_ID, EMPLOYEE_ID, TOTAL_VALUE)

- **Description:** The Invoice table records details of customer purchases. Each invoice includes an invoice number, purchase date, the employee who handled the sale, the total value of the invoice, and the customer ID if the customer is a member.
- **Columns:**
 - INVOICE_NO (Primary Key): Unique identifier for each invoice.
 - INVOICE_DATE: Date the invoice was issued.
 - CUSTOMER_ID (Foreign Key → CUSTOMER.CUSTOMER_ID): ID of the member customer (if applicable).
 - EMPLOYEE_ID (Foreign Key → EMPLOYEE.EMPLOYEE_ID): ID of the employee who processed the sale.
 - TOTAL_VALUE: Total monetary value of the invoice.

5. INVOICE_DETAIL (INVOICE_NO, PRODUCT_ID, QUANTITY)

- **Description:** The Invoice Detail table specifies the details of each invoice, including which products were purchased and the quantity of each product.
- **Columns:**
 - INVOICE_NO (Composite Primary Key, Foreign Key → INVOICE.INVOICE_NO): Links to the invoice.
 - PRODUCT_ID (Composite Primary Key, Foreign Key → PRODUCT.PRODUCT_ID): Identifies the product.
 - QUANTITY: Number of units of the product purchased in the invoice.
